Gas Barbecue Devices | Charcoal Barbecue Devices | Equipment & Spare Parts

**steel**line<sup>edition</sup>

## About 75 years ago ...

... **Fritz RAULWING** went by bike from Minden to the Ruhr Area to buy meat grinders. That's how the story of the Raulwing company began and is being continued today with the same traditional values as when it all began.

On August 20th, **1945**, our company founder, Fritz Raulwing, received permission to set up a wholesale business for butcher's requisites, which was then expanded in **1949** with a new office building in Minden. The activities of our family business, which was still young at the time, were increasingly based on nationwide sales in addition to the classic butcher's requisites for our regional customers.

In **1960**, an affiliated production department was created for the manufacture of a wide variety of butchery machines and grills, some of which were protected by utility models.

## A further milestone

... in our history was made in **1970** with the acquisition of a partnership in the DAGEMA bulk purchase. This meant that another, high-performance central warehouse was available — our regular customer base grew in proportion to our development.

In **1976**, the once entered path of expansion had to be met with the relocation to a larger building in the commercial area of Porta Westfalica.

Our success story is not least due to the cooperation of Fritz Raulwing's wife Frieda and her selfless support. The sons Friedel and Hans Raulwing also joined their father's business and continued to help the company grow from the 1970s until their death. It is thanks to them that we are still a family-run company in the 3rd generation, with customers in the butcher's trade, retail and catering service.

## Gas Barbecue Devices

Every professional values good work equipment. That's why you shouldn't be satisfied with less!

Raulwing's gas barbecue devices of the **steelline** edition have proven themselves a thousand times and are always used where real professionals have to meet the highest demands. Whether in mobile use for professional catering or stationary in restaurant kitchens around the world: Our devices distinguish themselves by their special performance and the solid stainless steel construction designed for continuous operation.

As an optional extra, you can have the grill grates with sticks lengthwise or with individually removable, 8 mm thick grill sticks. Gas barbecue devices of the **steelline** edition series are suitable for use with both liquid and natural gas.

**Grill grates**

As standard, all devices in this product line are equipped with 6 mm thick round steel grilling grates in a steep direction. On request, we can also supply the grill grates with lengthways bars or with individually removable 8 mm thick grill bars.

**Angled cover group**

Angled cover plates over the firing groups protect the flames from wind, water and dripping fat.

**Firing group, stainless steel, 3-times**

Depending on the device type, three to six infinitely adjustable three-pipe combustion groups made of stainless steel are installed, which can be operated independently of each other.

**Operating knob**

for manual comfort regulation of the individual firing groups - from very little to full gas.

**Fat tray**

The cooking fat is collected at this place for an easy and user-friendly disposal.

**Gas connection**

The gas connection is to be found with all devices at the rear right on the rear wall of the device.

**Base frame**

The base frame is available as an accessory for **ALL** devices.

<b>Model</b>	<b>WB-6-T-R</b>
Art.-No.:	15961
W x D x H	1200 x 562 x 355 mm
Weight	ca. 52 kg
Performance	<b>27 kW</b>
Consumption	2,00 kg/h (liquid gas) 2,86 m <sup>3</sup> /h (natural gas)

<b>Model</b>	<b>WB-5-T-R*</b>

**Base frame**

The base frame is available as an accessory for **ALL** devices.

**Only from Raulwing**

**Raulwing devices are a valuable investment:**

- ✓ The housings are made of brushed stainless steel, material 1.4301.
- ✓ The Raulwing quality promise: All individual parts are carefully checked before assembly, all devices are assembled by hand and individually tested.
- ✓ Our devices are always state-of-the-art, have been tested by the DVGW and of course bear the CE mark (German Technical and Scientific Association for Gas and Water).

**Charcoal Barbecue Devices**

„ Grilled food from charcoal tastes different!“

That is true. And that's why we have developed our **steelline** edition product line: For almost 75 years, the barbecue devices have been regarded as work tools for strenuous, mobile continuous use.

They consist of a stable stainless steel housing, which has become a real classic at all events where traditional charcoal grilling is required thanks to its solid, durable and practical construction.

The heat is regulated by adjusting the height of the grill grates using a lever arm attached to the side. A removable ash pan and charcoal storage container round off the **steelline** edition appliances.

**Moveable design**

Art.-No.:	15998

with 2 fixed castors and 2 swivel castors  
incl. locking brake.

## Installation & Repairs

**Note:** Installation of spare parts, changes in the type of gas and repairs to gas appliances may only be carried out by licensed gas fitters or trained experts!

### Pan made of stainless steel, WB-2

Art.-No.:	16000
Height	60 mm

**Pan, TYPE WB-2**

can be combined with other pans and combination grills from the **steel<sup>line</sup>** edition series for the use with two gas burners.

### Pan made of stainless steel, WB-3

Art.-No.:	16001
Height	60 mm

**Pan, TYPE WB-3**

can be combined with other pans and combination grills from the **steel<sup>line</sup>** edition series for the use with three gas burners.

### Splash & wind protection

Art.-No.:	19377
-----------	-------

**Splash & wind protection**

for all device sizes.

### Pressure controllers kit\*

Art.-No.:	16133
Tubing length	2 m

**Pressure controllers kit**

as a commercial version with overpressure and tube rupture protection.

### Air injector-Brass

Art.-No.:	16158
-----------	-------

(Air-milk mixing sleeve)

### Thermal element with nuts

Art.-No.:	16162
-----------	-------

### Handle with holder

Art.-No.:	16144
-----------	-------

### Firing group-Stainless steel

Art.-No.:	20035
-----------	-------

Stainless steel, 3-times

### Magnetic insert-Maxi

Art.-No.:	16159
-----------	-------

### All-gas valve

Art.-No.:	16104
-----------	-------

### Nozzle conversion kit per burner

Art.-No.:	16135 (to natural gas)
Art.-No.:	16136 (to propane gas)

\* All set components are also available individually.
